

Pier and Walkway Systems

The modular pier and walkway systems give you a wide range of layout choices for your worksite and have several advantages over other alternatives.

Strength and Durability

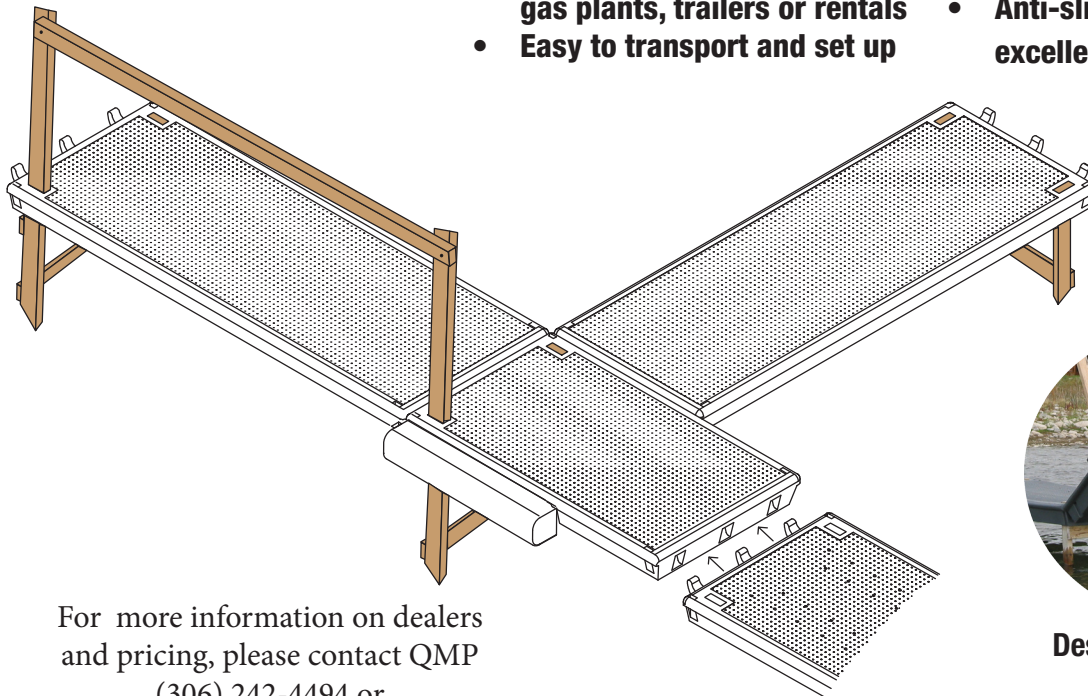

- Manufactured from virgin polyethylene for strong, light weight and durable walkway
- No maintenance. Does not rot. Easy to clean. Long life
- Oil, acid and water resistant

Light Weight and Easy to Use

- Modular Components
- Portable. Easy to install and to remove
- Sections can be supported by 2'x4' wood or steel legs
- Great for construction sites, gas plants, trailers or rentals
- Easy to transport and set up

Safety Features

- For larger orders, specialty colored parts available (i.e. Safety Yellow, Orange, etc.)
- 2'x4' construction can be extended to provide handrails.
- Can be grounded
- Anti-slip texture gives excellent traction

Design also useful for docks
